

lake tahoe basin

wastewater infrastructure capital rehabilitation and replacement program

**Lake Tahoe
Wastewater
Infrastructure
Partnership**

PURPOSE

To develop a comprehensive & implementable wastewater capital rehabilitation and replacement program.

GOAL To upgrade wastewater infrastructure and reduce risk of sewer failure in the Basin.

GOAL Possible incorporation of capital rehabilitation and replacement program as future Operations, Maintenance, Repair & Replacement element in an updated Environmental Improvement Program (EIP).

WHAT'S NEXT

- Developing sewer project identification processes
- Developing a sewer prioritization process
- Supporting education and outreach programs
- Developing a program-level regulatory permitting process
- Developing design and inspection guidelines and standards
- Developing projects for potential inclusion into EIP

A Partnership has been formed among the wastewater districts serving the Basin. This innovative partnership makes it possible to apply a programmatic approach to rehabilitation efforts within this unique environment.

Doing our part to restore the clarity of Lake Tahoe

The Partnership has allocated nearly \$1,000,000 toward creating a programmatic approach to wastewater capital rehabilitation and replacement.

CONTACT For more information on the status of the program, please contact:
