

APPENDIX C

PROJECT PHOTOGRAPHS

Photograph Log

1. Building 41, starting demolition of top story wooden structure. Partially demolished outlet junction box on right side of picture. (Looking northeast)
2. View from levee, demolition of outlet junction box. Wooden structure mostly demolished. Palm tree and blast shield at Revetment 6 in background. (Looking northwest)
3. A view of the shop area on north side of Building 41. Shop wall has been removed and excavator is demolishing cantilever roof. (Looking south)
4. Removed outlet piping later reused to bypass Building 41 inlet channel and direct PDD water north to current pump station. (Looking southwest)
5. Partially de-watered PDD showing condition of concrete lining. (Looking northeast)
6. Cleaning and de-watering PDD for sampling. (Looking northeast)
7. The first concrete story of Building 41 has been removed. Beginning excavation of West "L". Excavator is breaking concrete liner of PDD for pump placement and de-watering. (Looking east)
8. Building 41 demolished to ground level. Excavator loads Volvo A-35 off-road truck with soil from the West "L" Excavation. (Looking southeast)
9. Revetment 8 used for stockpiling clean demolition waste. (Looking southwest)
10. West "L" Excavation. (Looking north)
11. North Excavation. (Looking east)
12. North Excavation, chasing visible diesel contamination. (Looking southeast)
13. Excavating at Spoils Pile F area. (Looking north)
14. Excavating Spoils Pile F area. West "L" Excavation in foreground. (Looking east)
15. Nearing completion of Building 41 demolition. Wooden pile visible in center right of photograph. (Looking east)
16. Visible slumping of levee berm at east side of Building 41 Excavation prior to backfilling. (Looking east)
17. South Excavation. (Looking southwest)
18. Building 41 demolition at completion. (Looking northeast)
19. PDD with bank excavation visible. (Looking northeast)
20. Backfilling Building 41 and West "L" Excavations. (Looking northwest)
