Chapter 1	Approach 1-1
Chapter 2	Affected Environment 2-1
	2.1 Project Location 2-1
	2.1.1 Project Study Area 2-1
	2.1.2 Regional Study Area 2-1
	2.1.3 Great Salt Lake Ecosystem 2-2
	2.2 Physical Setting 2-2
	2.3 Regulatory Setting for Special-Status Wildlife 2-3
	2.3.1 Federal 2-4
	2.3.2 State of Utah 2-5
	2.4 Ecological Setting 2-6
	2.4.1 Existing Wildlife Habitats in Project Study Area 2-6
	2.4.2 Existing Distribution and Use of Wildlife Habitats 2-15
	2.4.3 Special-Status Species 2-19
	2.4.4 Existing Habitat Fragmentation 2-26
	2.4.5 Status of Existing Habitat Quality 2-26
	2.4.6 Status of Existing Wetland Hydrology 2-27
	2.4.7 Existing Artificial Landscaping in Project Vicinity 2-27
	2.4.8 Existing Sources of Direct Wildlife Mortality in Project Vicinity 2-27
	2.4.9 Existing Sources and Levels of Noise in Project Vicinity 2-28
	2.4.10 Existing Sources of Artificial Light in Project Vicinity 2-28
	2.4.11 Existing Sources of Human Disturbance in Project Vicinity 2-29
Chapter 3	Environmental Consequences 3-1
	3.1 Direct Habitat Loss 3-1
	3.1.1 Methods 3-1
	3.1.2 Results 3-2
	3.1.3 Potential Effects of Direct Habitat Loss on Wildlife Species of Concern 3-5
	3.2 Combined Effects of Changes in Lake Level on Habitat Availability and Habitat Loss from Build Alternatives 3-5
	3.2.1 Methods 3-5

	3.2.2 Results.....	3-6
	3.2.3 Potential Combined Effects of Changes in Lake Level on Habitat Availability and Habitat Loss from Build Alternatives on Migratory Birds.....	3-9
3.3	Habitat Fragmentation.....	3-10
	3.3.1 Methods.....	3-10
	3.3.2 Results.....	3-13
	3.3.3 Potential Effects of Habitat Fragmentation on Special-Status Species.....	3-16
3.4	Changes in Habitat Quality.....	3-17
	3.4.1 Air Quality.....	3-17
	3.4.2 Water Quality.....	3-18
	3.4.3 Catastrophic Hazardous Materials Spills.....	3-19
3.5	Habitat Modification.....	3-19
	3.5.1 Wetland Hydrology.....	3-19
	3.5.2 Artificial Landscaping.....	3-20
3.6	Wildlife Mortality.....	3-20
3.7	Artificial Light Disturbance.....	3-21
	3.7.1 Methods.....	3-21
	3.7.2 Results.....	3-21
3.8	Highway Noise Disturbance.....	3-22
	3.8.1 Methods.....	3-22
	3.8.2 Results.....	3-23
3.9	Human Disturbance.....	3-31
3.10	Effects on Special-Status Wildlife.....	3-32
	3.10.1 Agency Consultation and Coordination History.....	3-32
	3.10.2 Agency Coordination since Publication of Final EIS.....	3-32
	3.10.3 Special-Status Species.....	3-33
3.11	Cumulative Effects.....	3-43
	3.11.1 Historic Conditions: Cumulative Habitat Loss/Degradation from Past Activities.....	3-44
	3.11.2 Recent Trends in Permitted Loss of Wetlands.....	3-45
	3.11.3 Foreseeable Future Conditions.....	3-46
	3.11.4 Cumulative Effects Analysis Summary.....	3-52
Chapter 4	References	4-1
	4.1 Printed References.....	4-1
	4.2 Personal Communications.....	4-6
Chapter 5	List of Preparers	5-1
	5.1 Preparers.....	5-1
	5.1.1 Federal Lead Agencies.....	5-1
	5.1.2 Jones & Stokes.....	5-1
	5.2 Contributors.....	5-2
	5.2.1 Wildlife Technical Team.....	5-2
	5.2.2 Science Technical Team.....	5-2

Tables

Chapter 2 tables appear immediately after the chapter text.

2-1	Special-Status Wildlife Species of the Legacy Parkway Project Area/Great Salt Lake Ecosystem
2-2	Wildlife and Fish of Open Water Habitat
2-3	Wildlife of Riparian Habitat
2-4	Wildlife and Fish of Emergent Marsh Habitat
2-5	Wildlife of Wet Meadow Habitat
2-6	Wildlife of Mudflat/Pickleweed Habitat
2-7	Wildlife of Pasture Habitat
2-8	Wildlife of Cropland Habitat
2-9	Wildlife of Salt Desert Scrub Habitat
2-10	Wildlife of Developed Habitat (including Urban Landscaping)
2-11	Wildlife Species Summary: Number of Species by Status and Habitat Use
2-12	Bird Species' Common Use of Habitats
2-13	Summary of Bird Use of Habitats in the Project Study Area
2-14	Population Status and Habitat Use of Representative Migratory Birds Using Habitats in Project and Regional Study Areas
2-15	Mean and Peak Survey Values for Selected Species at Survey Site 42 (East Farmington Bay) 1997–2001
2-16	Comparison of 2001 and 2002 Legacy Nature Preserve Surveys with Great Salt Lake Ecosystem Surveys
2-17	Short-Term Sound Level Measurements
2-18	Mean, Standard Deviation, Minimum, and Maximum Noise Levels

Chapter 3 tables appear immediately after the chapter text.

- 3-1 Summary of Direct Habitat Loss of Wetland/Riparian and Upland Wildlife Habitats by Alternative
- 3-2 Wildlife Habitat Availability within the Regional Study Area at Low and High Levels
- 3-3 Wildlife Habitat within the Project Study Area at Low and High Levels
- 3-4 Summary of Habitat Fragmentation by Habitat Category Resulting from Build Alternatives
- 3-5 Summary of Habitat Fragmentation by Habitat Type Resulting from Build Alternatives
- 3-6 Typical Highway Runoff Contaminants
- 3-7 Wildlife Habitat (by Special-Status Bird Species) That Would Potentially Be Affected by Highway Noise
- 3-8 Areal Comparison of the Build Alternatives and the Regional Study Area
- 3-9 Comparison of Estimated Historic Wetland/Wildlife Habitat and Current Habitat Availability by Hydrologic Unit
- 3-10 Ownership Status of Regional Study Area and Ownership Status of Wetland / Riparian Habitats
- 3-11 Distribution of Available Habitat at Low and High Water by Ownership Status and Watershed
- 3-12 Distribution of Existing Habitat in the Region by Potential Population Density Category (2001–2030)
- 3-13 Distribution of Existing Habitat in the Jordan River Hydrologic Unit by Potential Population Density Category (2001–2030)
- 3-14 Distribution of Existing Habitat in the Ogden Hydrologic Unit by Potential Population Density Category (2001–2030)
- 3-15 Potential Impact of Future Development and the Build Alternatives in the Project Study Area

Figures

Chapter 2 figures appear immediately after the chapter tables.

2-1	Location of Great Salt Lake in Lake Bonneville Basin
2-2	Great Salt Lake Ecosystem (GSLE) Area
2-3	Legacy Parkway Project and Regional Study Areas
2-4	Historical Great Salt Lake Hydrograph
2-5	Western Hemisphere Shorebird Reserve Network (WHSRN) Sites
2-6	Total Existing Wildlife Habitat in Project Study Area
2-7	Wildlife Habitat in the Legacy Parkway Project Study Area
2-8	Great Salt Lake Waterbird Survey Areas
2-9	Distribution and Abundance of Great Salt Lake Migratory Waterbirds
2-10	Number of Existing Habitat Patches within the Project Study Area
2-11	Noise Monitoring Sites in the Legacy Parkway Project Study Area
2-12	Background Sound and Wind Levels at Long-Term Position 1

Chapter 3 figures appear immediately after the chapter tables.

3-1	Project Study Area: Potential Direct Habitat Loss
3-2	Total Direct Habitat Loss in Project Study Area
3-3	Direct Habitat Loss By Habitat Type in Project Study Area
3-4	Great Salt Lake Inundation Zones
3-5	Great Salt Lake Inundation Zones Relative to Build Alternatives
3-6	Percent Habitat Inundated with Changing Lake Levels
3-7	Percent Cropland Habitat Loss from Project Alternatives at Varying Lake Levels

- 3-8 Percent Emergent Marshland Habitat Loss from Project Alternatives at Varying Lake Levels
- 3-9 Percent Mudflat/Pickleweed Habitat Loss from Project Alternatives at Varying Lake Levels
- 3-10 Percent Open Water Habitat Loss from Project Alternatives at Varying Lake Levels
- 3-11 Percent Pasture Habitat Loss from Project Alternatives at Varying Lake Levels
- 3-12 Percent Riparian Habitat Loss from Project Alternatives at Varying Lake Levels
- 3-13 Percent Scrub Habitat Loss from Project Alternatives at Varying Lake Levels
- 3-14 Percent Wet Meadow Habitat Loss from Project Alternatives at Varying Lake Levels
- 3-15 Wildlife Habitat Availability in Project Study Area at Low and High Lake Levels
- 3-16 Wildlife Habitat Availability in Regional Study Area at Low and High Lake Levels
- 3-17 Conceptual Ecological Model: Dynamics of Great Salt Lake Shoreline Habitats
- 3-18 Wildlife Habitats and Build Alternatives in the Project Study Area
- 3-19 Regional Study Area Estimate Historic Extent of Wetland/Wildlife Habitat
- 3-20 Regional Study Area Land Cover
- 3-21 Legacy Parkway Study Area Potential Future Development
- 3-22 Highway Incidents Involving Hazardous Materials in Utah
- 3-23 Threshold Noise Level Determination for Representative Grassland Birds
- 3-24 Highway Noise Level Contours for the Legacy Parkway
- 3-25 TNM Predicted Total Habitat Area Affected by Highway Noise
- 3-26 Bird Vocalization Sonograms
- 3-27 Traffic Masking Thresholds and Vocal Signal Profiles at 50 Feet
- 3-28 Masking Distances
- 3-29 Extent of Permitted Actions in Wetlands in Salt Lake and Davis Counties (1992–2003)
- 3-30 Land Cover, Ownership Status, and Lake Level Change

Appendices

- A **Species-Habitat Matrices**
- B **GIS Data Documentation and Methods**
- C **Common and Scientific Names of Wildlife Species**
- D **Effects of Artificial Light on Wildlife**
- E **Bioacoustics Analysis of Potential Effects of Highway
Noise on Wildlife of Great Salt Lake**
- F **Agency Coordination and Consultation**
