ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 - site conditions; paragraphs 2-3 - rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 - site information on waters of the U.S. occurring onsite): The wetland S1 receives flows from the north but due to the site topography, the water is contained entirely within that feature and does not flow to any other water of the United States. Within the Panhandle properties, burrowing owls are present and would be likely to occur onsite. Additionally, potential habitat for vernal pool fairy shrimp is present.
