ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 - site conditions; paragraphs 2-3 - rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 - site information on waters of the U.S. occurring onsite): No known hydrologic connection (surface or subsurface) to a water of the United States. SW-1 appears to be a man-made excavated scald designed to capture and retain irrigation runoff from discontinued strawberry field. Site is currently fallow and periodically tilled for weed control. Mallard present onsite during field inspection on 1/19/06. See delineation report in file.
