Sacramento, CA 95814-2922

Public Notice

Number: 199925096
Date: September 23, 2005

SUBJECT: The U.S. Army Corps of Engineers, Sacramento District, (Corps) has issued Regional General Permit 16 (GP16), for a period of 5 years. This action was taken under the authority of Section 10 of the Rivers and Harbors Act of 1899 and Section 404 of the Clean Water Act. This general permit which authorizes activities with minimal individual and cumulative impacts in waters of the United States, including wetlands, in the Lake Tahoe Basin.

The decision to issue this general permit was based on an evaluation of the potential individual and cumulative impacts of work already completed under this general permit as well as those impacts associated with anticipated future work. Comments received in response to the public notice advertising the intent to reissue this general permit with modifications were also considered in the evaluation. The District Engineer concluded that issuance of the general permit complies with the Environmental Protection Agency's Section 404(b)(1) Guidelines and that reissuance is not contrary to the public interest. The activities to be authorized under this general permit are similar in nature and will result in similar impacts to water quality and the aquatic environment. They will result in only minimal adverse impacts, both individually and cumulatively.
