# LEVEE IMPROVEMENTS WILL SOON BRING LOWER FLOOD RISK

The U.S. Army Corps of Engineers, in partnership with the California Central Valley Flood Protection Board, California Department of Water Resources and the Sacramento Area Flood Control Agency, will be constructing levee improvements along the Sacramento River East Levee from downtown Sacramento to Freeport. This work is part of the American River Watershed Common Features, WRDA 2016 project authorized by Congress in 2016.

## What to Expect

### Pre-construction (December 2019-March 2020)

Relocate utilities, remove encroachments, cut and trim trees located only in the construction footprint.

### Levee Construction (Spring 2020-Fall 2020)

Degrade existing levee up to 1/2 its height, install slurry cutoff walls and rebuild levee section. Haul trucks and work crews will access levee at points near construction work areas shown on map.

### Recreational Impacts

Temporary closure of the Sacramento River bike trail in the Pocket area and north of Sutterville Road.

Garcia Bend Park boat ramp/launch area and boat trailer parking area will be closed. The park will remain open throughout construction
