TO NATIVE AMERICAN TRIBES:

The U.S. Army Corps of Engineers, Sacramento District (Corps) and the Central Valley Flood Protection Board (CVFPB) will be holding two open forums to provide information on the Folsom Dam Raise (Dam Raise) and Folsom Dam Water Control Manual Update (Manual Update) and to solicit input from the Native American tribes. The Dam Raise was most recently authorized in the 2004 Energy and Water Development Appropriations Act, Public Law (PL) 108-137, and the Manual Update was authorized in the Water Resources Development Act of 1999, PL 106-53. The Corps and CVFPB are preparing two separate draft Supplemental Environmental Impact Statement/ Environmental Impact Reports (SEIS/SEIR), one for the Dam Raise and one for the Manual Update, to evaluate potential impacts as a result of the independent projects. The Corps will serve as lead agency for compliance with the National Environmental Policy Act (NEPA) and the National Historic Preservation Act of 1966, as amended (NHPA), and CVFPB will serve as lead agency for compliance with the California Environmental Quality Act (CEQA). For the Dam Raise the U.S. Bureau of Reclamation (Reclamation) is an involved party and for the Manual Update Reclamation is a cooperating agency. The Sacramento Area Flood Control Agency is a responsible agency for both projects.

Pursuant to 36 CFR § 800.3(f)(2), the implementing regulations of Section 106 of the NHPA, the Corps has identified you as a Native American tribe that may be interested in consulting on the Dam Raise and the Manual Update. These forums will only be open to Native American tribes.

Folsom Dam and Lake is a multipurpose project operated by Reclamation as a part of the Central Valley Project. The Corps is responsible for prescribing operations pertaining to use of the storage allocated for flood risk management. The dam provides flood risk management benefits to the city of Sacramento and its surrounding areas by regulating runoff from approximately 1,860 square miles of drainage area.

The purpose of the Dam Raise is flood risk management and ecosystem restoration. The Dam Raise is authorized for 4 components: 1) emergency spillway gate modifications; 2) raising the right and left wings of the main dam, Mormon Island Auxiliary Dam (MIAD), and the reservoir dikes (1-8) by 3.5 feet; 3) temperature control shutter automation and reconfiguration; and 4) downstream ecosystem restoration of Bushy Lake and Woodlake. The current Dam Raise analysis will address the flood damage reduction components, the emergency spillway gate modifications and the 3.5 foot raise, which are being prioritized for construction. The Dam Raise project will address the proposed structural modifications to the Folsom Dam, MIAD, and the dikes

only. Any changes in operation as a result of the construction of these projects, downstream ecosystem restoration, temperature control shutter automation, and reconfiguration components of the Dam Raise will be addressed in the future. A preliminary area of potential effects (APE) for the Dam Raise is shown in Enclosure 1.

The Folsom Dam Joint Federal Project, currently under construction, consists of a new auxiliary spillway with a crest elevation 50 feet lower in elevation than the current gated spillways on the main dam. In order to fully realize the benefits of the new auxiliary spillway, the current Folsom Dam and Lake Water Control Manual must be updated. The Manual Update will identify, evaluate, and recommend changes to the flood management operation rules of Folsom Dam and Lake to reduce flood risk to the Sacramento area by utilizing the new auxiliary spillway and by incorporating an improved understanding of the American River watershed upstream of Folsom Dam. The findings of the evaluation will be used to help define the Dam's new flood operations plan, with the intention of meeting flood risk management objectives and dam safety requirements in a manner that conserves as much water as possible and maximizes all authorized Folsom Dam project uses to the extent practicable. The Manual Update will not cover operational activities of Folsom Dam and Lake that Reclamation is responsible for. A preliminary APE for the Manual Update is shown in Enclosure 2.

In accordance with Section 106 of the NHPA, the Corps is required to take into account the effects of their undertakings on historic properties. This includes the identification of historic properties, finding of effect, and the resolution of adverse effects through the process identified in 36 CFR § 800. As part of our efforts to identify historic properties and consider the views of Native American tribes, we are inviting you to attend the open forums and consult on the Dam Raise and Manual Update projects. Your input on the above topics and any associated items that are important to you will be used to:

- Further determine the scope of the analysis in the SEIS/SEIR documents and in the efforts to identify historic properties.
- Provide input on the range of alternatives to be evaluated in the SEIS/SEIR.
- Obtain local knowledge or information to assist in the environmental analysis and assessment of adverse effects on historic properties.

Project team staff will be on hand to accept comments and address questions regarding the projects. You will be given the opportunity to provide written and verbal comments at the open forums.

Written comments and suggestions about the Dam Raise and Manual Update may be submitted to Melissa Montag, Corps Cultural, Recreational, & Social Assessment Section. For e-mailed comments, please include "Folsom Dam Raise" or "Folsom Manual Update" in the subject line, attach comments in MS Word format, and include the commenter's U.S. Postal Service mailing address. Questions about the projects and the SEIS/SEIR should be addressed to:

Subject: National Historic Preservation Act (NHPA) Section 106 Designation of Lead Federal
Agency for the Folsom Dam and Lake Water Control Manual Update
(Project #15-CCAO-033)

Dear Mr. Ziminske:

The U.S. Army Corps of Engineers (Corps) and the Bureau of Reclamation are proposing to update the Folsom Dam and Lake Water Control Manual (WCM) to implement new operational criteria to meet flood risk management objectives for the new Folsom Dam Safety/Flood Reduction Project (Joint Federal Project) at Folsom Dam. While Reclamation is responsible for daily operation of the dam, the Corps' Sacramento District is responsible for developing and prescribing flood risk management operations for the Folsom Dam Project. A change in operation of Folsom Dam and Lake, Federal facilities, are subject to compliance with Title 54 U.S.C. §306108, commonly known as Section 106 of the NHPA, and the implementing regulations at 36 CFR Part 800. As the Corps and Reclamation both have responsibilities under Section 106, Reclamation is designating the Corps as lead Federal agency for compliance with Section 106, pursuant to 36 CFR § 800.2(a)(2). As lead Federal agency, the Corps will act on our behalf, fulfilling the collective responsibilities of both agencies for Section 106 consultations regarding updating the WCM.

As lead agency, the Corps will coordinate and consult with Reclamation throughout the Section 106 process. The process would include: identifying and consulting with required and interested parties; defining the area of potential effects; establishing the scope of identification efforts; determining eligibility of cultural resources for listing on the National Register of Historic Places; making a finding of effect; and developing agreement documents, as required under 36 CFR Part 800. Reclamation will retain responsibility for issuing permission to access Reclamation lands and Archaeological Resource Protection Act permits, if required, for purposes of conducting cultural resources studies. Should Reclamation and the Corps fail to agree on a finding of effect, the agencies may invite the Advisory Council on Historic Preservation to assist in coming to agreement, or Reclamation may proceed individually to meet Section 106 responsibilities.

Reclamation requests that the Corps accepts Federal lead agency status for Section 106 compliance for updating the WCM. If you have any questions or concerns about this designation of Lead Agency, please contact Mr. Scott Williams, Archaeologist, at 916-978-5042 or sawilliams@usbr.gov.

Sincerely,

Anastasia T. Leigh
