APPROVED JURISDICTIONAL DETERMINATION FORM U.S. Army Corps of Engineers

JD Status: DRAFT

SPK-2002-50238(A)

SECTION I: BACKGROUND INFORMA	ATION
A. REPORT COMPLETION DATE FOR APPR	ROVED JURISDICTIONAL DETERMINATION (JD): 11-Mar-2010
B. DISTRICT OFFICE, FILE NAME, AND NUI	WBER: Sacramento District, SPK-2002-50238-JD1
C. PROJECT LOCATION AND BACKGROUN	ND INFORMATION:
State :	NV - Nevada
County/parish/borough:	Clark
City:	Laughlin
Lat:	35.12319
Long:	-114.63015
Universal Transverse Mercator	Folder UTM List
Offiver sur Transverse Mercutor	UTM list determined by folder location
	NAD83 / UTM zone 11N
	Waters UTM List
	UTM list determined by waters location
	NAD83 / UTM zone 11N
Name of popular waterbacky	• NAD63 / OTIVI ZOTIE TTN
Name of nearest Traditional Newtonkle West	/TANA/).
Name of nearest Traditional Navigable Wat Name of watershed or Hydrologic Unit Cod	
Check if map/diagram of review area and	d/or potential jurisdictional areas is/are available upon request.
Check if other sites (e.g., offsite mitigatio form.	on sites, disposal sites, etc¿) are associated with the action and are recorded on a different JD
D. REVIEW PERFORMED FOR SITE EVALU	ATION:
Office Determination Date:	
Field Determination Date(s): 08-Feb	-2010
SECTION II: SUMMARY OF FINDINGS	
SECTION II. SUMMART OF FINDINGS	
A. RHA SECTION 10 DETERMINATION OF J	JURISDICTION
There are "navigable waters of the U.S." within	in Rivers and Harbors Act (RHA) jurisdiction (as defined by 33 CFR part 329) in the review area.
Waters subject to the ebb and fl	ow of the tide.
Waters are presently used, or had commerce.	ave been used in the past, or may be susceptible for use to transport interstate or foreign
Explain: The project is located on the Colorad	do River
B. CWA SECTION 404 DETERMINATION OF	JURISDICTION.
There [] "waters of the U.S." within Clean W	ater Act (CWA) jurisdiction (as defined by 33 CFR part 328) in the review area.
. Waters of the U.S.	
. Indicate presence of waters of U.S. in revie	
Water Name Water Type(s) Pre	esent

TNWs, including territorial seas

b. Identify (estimate) s	size of waters of the U.S. in the review area:	
Area: (m²) Linear: (m)		
c. Limits (boundaries)	of jurisdiction:	
based on: Esta OHWM Elevation: (if k	ablished by OHWM. nown)	
2. Non-regulated wate	rs/wetlands: ³	
Potentially jurisdiction	nal waters and/or wetlands were assessed within the r	eview area and determined to be not jurisdictional. Explain:
SECTION III: CWA	ANALYSIS	
A. TNWs AND WETL	ANDS ADJACENT TO TNWs	
1.TNW		
TNW Name	Summarize rationale supporting determination:	
SPK-2002-50238(A)	The project is located on the Colorado River.	
Not Applicable. B. CHARACTERISTICS	S OF TRIBUTARY (THAT IS NOT A TNW) AND ITS ADJ	ACENT WETLANDS (IF ANY):
1. Characteristics of n	on-TNWs that flow directly or indirectly into TNW	
(i) General Area Condi Watershed size: Drainage area: Average annual rainfa Average annual snow	[] [] all: inches	
(ii) Physical Character (a) Relationship with 1		
Tributary flows dire	ectly into TNW.	
Tributary flows thro	ough [] tributaries before entering TNW.	
Project waters cro	ss or serve as state boundaries.	
Explain:	F	
Identify flow route to	TNW: ⁹	
Tributary Stream Orde Not Applicable.	er, if known:	
(b) General Tributary (Characteristics:	
Tributary is: Not Applicable.		

(d) Proximity (Relationship) to TNW: Not Applicable.

Tributary properties with respect to top of bank (estimate): Not Applicable.
Primary tributary substrate composition: Not Applicable.
Tributary (conditions, stability, presence, geometry, gradient): Not Applicable.
(c) Flow: Not Applicable.
Surface Flow is: Not Applicable.
Subsurface Flow: Not Applicable.
Tributary has: Not Applicable.
If factors other than the OHWM were used to determine lateral extent of CWA jurisdiction:
High Tide Line indicated by: Not Applicable.
Mean High Water Mark indicated by: Not Applicable.
(iii) Chemical Characteristics: Characterize tributary (e.g., water color is clear, discolored, oily film; water quality;general watershed characteristics, etc.). Not Applicable.
(iv) Biological Characteristics. Channel supports: Not Applicable.
2. Characteristics of wetlands adjacent to non-TNW that flow directly or indirectly into TNW
(i) Physical Characteristics: (a) General Wetland Characteristics: Properties: Not Applicable.
(b) General Flow Relationship with Non-TNW:
Flow is: Not Applicable.
Surface flow is: Not Applicable.
Subsurface flow: Not Applicable.
(c) Wetland Adjacency Determination with Non-TNW: Not Applicable.

https://orm.usace.army.mil/orm2/f?p=106:34:3940609933703807::NO::APP_FORM_ID:22656

(ii) Chemical Characteristics:

Characterize tributary (e.g., water color is clear, discolored, oily film; water quality; general watershed characteristics, etc.). Not Applicable.

(iii) Biological Characteristics. Wetland supports:

Not Applicable.

3. Characteristics of all wetlands adjacent to the tributary (if any):

All wetlands being considered in the cumulative analysis:

Not Applicable.

Summarize overall biological, chemical and physical functions being performed:

Not Applicable.

C. SIGNIFICANT NEXUS DETERMINATION

A significant nexus analysis will assess the flow characteristics and functions of the tributary itself and the functions performed by any wetlands adjacent to the tributary to determine if they significantly affect the chemical, physical, and biological integrity of a TNW. For each of the following situations, a significant nexus exists if the tributary, in combination with all of its adjacent wetlands, has more than a speculative or insubstantial effect on the chemical, physical and/or biological integrity of a TNW. Considerations when evaluating significant nexus include, but are not limited to the volume, duration, and frequency of the flow of water in the tributary and its proximity to a TNW, and the functions performed by the tributary and all its adjacent wetlands. It is not appropriate to determine significant nexus based solely on any specific threshold of distance (e.g. between a tributary and its adjacent wetland or between a tributary and the TNW). Similarly, the fact an adjacent wetland lies within or outside of a floodplain is not solely determinative of significant nexus.

Significant Nexus: Not Applicable

D. DETERMINATIONS OF JURISDICTIONAL FINDINGS. THE SUBJECT WATERS/WETLANDS ARE:

1. TNWs and Adjacent Wetlands:

Wetland Name	Туре	Size (Linear) (m)	Size (Area) (m²)
SPK-2002-50238(A)	TNWs, including territorial seas	-	1011.714
Total:		0	1011.714

2. RPWs that flow directly or indirectly into TNWs:

Not Applicable.

Provide estimates for jurisdictional waters in the review area:

Not Applicable.

3. Non-RPWs that flow directly or indirectly into TNWs:8

Not Applicable.

Provide estimates for jurisdictional waters in the review area:

Not Applicable.

4. Wetlands directly abutting an RPW that flow directly or indirectly into TNWs.

Not Applicable.

Provide acreage estimates for jurisdictional wetlands in the review area:

Not Applicable.

5. Wetlands adjacent to but not directly abutting an RPW that flow directly or indirectly into TNWs:

Not Applicable.

Provide acreage estimates for jurisdictional wetlands in the review area: Not Applicable.
6. Wetlands adjacent to non-RPWs that flow directly or indirectly into TNWs: Not Applicable.
Provide estimates for jurisdictional wetlands in the review area: Not Applicable.
7. Impoundments of jurisdictional waters: ⁹ Not Applicable.
E. ISOLATED [INTERSTATE OR INTRA-STATE] WATERS INCLUDING ISOLATED WETLANDS, THE USE, DEGRADATION OR DESTRUCTION OF WHICH COULD AFFECT INTERSTATE COMMERCE, INCLUDING ANY SUCH WATERS: ¹⁰ Not Applicable.
Identify water body and summarize rationale supporting determination: Not Applicable.
Provide estimates for jurisdictional waters in the review area: Not Applicable.
F. NON-JURISDICTIONAL WATERS. INCLUDING WETLANDS
If potential wetlands were assessed within the review area, these areas did not meet the criteria in the 1987 Corps of Engineers Wetland Delineation Manual and/or appropriate Regional Supplements:
Review area included isolated waters with no substantial nexus to interstate (or foreign) commerce:
Prior to the Jan 2001 Supreme Court decision in "SWANCC," the review area would have been regulated based soley on the "Migratory Bird Rule" (MBR):
Waters do not meet the "Significant Nexus" standard, where such a finding is required for jurisdiction (Explain):
Other (Explain):
Provide acreage estimates for non-jurisdictional waters in the review area, where the sole potential basis of jurisdiction is the MBR factors (ie., presence of migratory birds, presence of endangered species, use of water for irrigated agriculture), using best professiona judgment: Not Applicable.
Provide acreage estimates for non-jurisdictional waters in the review area, that do not meet the "Significant Nexus" standard, where such a finding is required for jurisdiction. Not Applicable.
SECTION IV: DATA SOURCES.
A. SUPPORTING DATA. Data reviewed for JD (listed items shall be included in case file and, where checked and requested, appropriately reference below): Not Applicable.
B. ADDITIONAL COMMENTS TO SUPPORT JD: Not Applicable.
1

 $^{^{1}}$ -Boxes checked below shall be supported by completing the appropriate sections in Section III below.

²-For purposes of this form, an RPW is defined as a tributary that is not a TNW and that typically flows year-round or has continuous flow at least "seasonally" (e.g., typically 3 months).

³-Supporting documentation is presented in Section III.F.

⁴-Note that the Instructional Guidebook contains additional information regarding swales, ditches, washes, and erosional features generally and in the arid West.

⁵-Flow route can be described by identifying, e.g., tributary a, which flows through the review area, to flow into tributary b, which then flows into TNW.

⁶-A natural or man-made discontinuity in the OHWM does not necessarily sever jurisdiction (e.g., where the stream temporarily flows underground, or where the OHWM has been removed by development or agricultural practices). Where there is a break in the OHWM that is unrelated to the waterbody's flow regime (e.g., flow over a rock outcrop or through a culvert), the agencies will look for indicators of flow above and below the break.

^{7&}lt;sub>-Ihio</sub>

⁸-See Footnote #3.

 $^{^{\}rm 9}$ -To complete the analysis refer to the key in Section III.D.6 of the Instructional Guidebook.

¹⁰-Prior to asserting or declining CWA jurisdiction based solely on this category, Corps Districts will elevate the action to Corps and EPA HQ for review consistent with the process described in the Corps/EPA Memorandum Regarding CWA Act Jurisdiction Following Rapanos.
