- **Complete Table 1 - Required**

*NOTE:* If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Section 10 navigable waters list, **DO NOT USE THIS FORM TO MAKE THE DETERMINATION.** The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Section 10 RHA navigability determination.

**Table 10. Non-Waters/Excluded Waters and Features**

<b>Paragraph (b) Excluded Feature/Water Name</b>	<b>Rationale for Paragraph (b) Excluded Feature/Water and Additional Discussion.</b>
Unnamed Drainage 3	Based on google earth historical aerial images the road was constructed and the culvert placed between 1969 and 1987. The 1955 and 2018 USGS maps do not indicate the presence of any channel at this location. It appears that the construction of the road constricts sheet flow from precipitation into the culvert. The applicant supplied delineation titled Aquatic Resources Delineation Report Oflying Water Quality Project prepared by NCE states that Unnamed Drainage 3 was observed to be dry suring the survey. Unnamed drainage 3 starts at a culvert under Pioneer trail south of the intersection with Elks Club Drive. Approximately 61-feet downstream of the culvert Unnamed Drainage 3 loses OHWM indicators and, dissipates into uplands and does not connect to another aquatic resource.
