¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: The subject area is 0.31 acre in size and is located in a vacant lot in an urbanized area along State Street in Clearfield, Utah. After a review of the site using office resources, such as ArcGIS, soil survey data, national wetlands inventory mapping, and aerial photos, I have determined that the 0.31-acre project site consists entirely of uplands and upland features. The National Wetlands Inventory map, historical imagery, and Natural Resources Conservation Service Soil Survey each support this determination. There are no aerial photograph signatures, NWI data, NHD data, USGS topographic data, or other data suggesting the presence of aquatic resources on the subject site, nor are there any nearby streams or other major drainages.
