INTERIM APPROVED JURISDICTIONAL DETERMINATION FORM U.S. Army Corps of Engineers

This form should be completed by following the instructions provided in the Interim Approved Jurisdictional Determination Form User Manual.

SECTION I: BACKGROUND INFORMATION

A. COMPLETION DATE FOR APPROVED JURISDICTIONAL DETERMINATION (AJD): November 15, 2019

B. ORM NUMBER IN APPROPRIATE FORMAT (e.g., HQ-2015-00001-SMJ): SPK-2019-00748

C. PROJECT LOCATION AND BACKGROUND INFORMATION:

State: California

County/parish/borough: Placer County

City:

Center coordinates of site (lat/long in degree decimal format): Lat. 38.787597, Long. -121.307062.

Map(s)/diagram(s) of review area (including map identifying single point of entry (SPOE) watershed and/or potential jurisdictional areas where applicable) is/are: attached in report/map titled Aquatic Resources Delineation Report, Roseville Parkway Extension, Figure 3, Aquatic Resources Delineation, dated October 2019.

Other sites (e.g., offsite mitigation sites, disposal sites, etc.) are associated with this action and are recorded on a different jurisdictional determination (JD) form. List JD form ID numbers (e.g., HQ-2015-00001-SMJ-1): .

D. REVIEW PERFORMED FOR SITE EVALUATION:

Office (Desk) Determination Only. Date: November 8, 2019.

Office (Desk) and Field Determination. Office/Desk Dates: . Field Date(s): .

SECTION II: DATA SOURCES

Check all that were used to aid in the determination and attach data/maps to this AJD form and/or references/citations in the administrative record, as appropriate.

Maps, plans, plots or plat submitted by or on behalf of the applicant/consultant. Title/Date: Aquatic Resources Delineation Report, Roseville Parkway Extension, Figure 3, Aquatic Resources Delineation, dated October 2019.

Data sheets prepared/submitted by or on behalf of the applicant/consultant.

Data sheets/delineation report are sufficient for purposes of AJD form. Title/Date: Aquatic Resources Delineation Report, Roseville Parkway Extension, Figure 3, Aquatic Resources Delineation, dated October 2019.

Data sheets/delineation report are not sufficient for purposes of AJD form. Summarize rationale and include information on revised data sheets/delineation report that this AJD form has relied upon:

Revised Title/Date: .

Data sheets prepared by the Corps. Title/Date: .

Corps navigable waters study. Title/Date: .

CorpsMap ORM map layers. Title/Date: ORM Project Locations and ORM Aquatic Resources layers, accessed November 8, 2019.

USGS Hydrologic Atlas. Title/Date: .

USGS, NHD, or WBD data/maps. Title/Date: EPA MyWaters, accessed November 8, 2019.

USGS 8, 10 and/or 12 digit HUC maps. HUC number: HUC 180201610302, Pleasant Grove Creek.

USGS maps. Scale & quad name and date: Lincoln 15-Minute USGS topographic quadrangle, dated 1953, Roseville 7.5 minute USGS topographic quadrangle, dated 1982.

USDA NRCS Soil Survey. Citation: <http://websoilsurvey.nrcs.usda.gov>, accessed November 8, 2019.

USFWS National Wetlands Inventory maps. Citation: <https://www.fws.gov/wetlands/data/mapper.html>, accessed November 8, 2019.

State/Local wetland inventory maps. Citation: .

- FEMA/FIRM maps. Citation: Panel 06061C0941H, eff. 11/2/2018.
- Photographs: Aerial. Citation: <https://www.historicaerials.com/viewer>, accessed November 8, 2019. or Other. Citation: Available Google Earth Pro aerial imagery from May 22, 1993 to October 31, 2018.
- LiDAR data/maps. Citation:
- Previous JDs. File no. and date of JD letter: SPK-2005-00842, Foothills Distribution Center, March 10, 2006.
- Applicable/supporting case law:
- Applicable/supporting scientific literature:
- Other information (please specify):

SECTION III: SUMMARY OF FINDINGS

Complete ORM "Aquatic Resource Upload Sheet" or Export and Print the Aquatic Resource Water Droplet Screen from ORM for All Waters and Features, Regardless of Jurisdictional Status – Required

A. RIVERS AND HARBORS ACT (RHA) SECTION 10 DETERMINATION OF JURISDICTION:

- "navigable waters of the U.S." within RHA jurisdiction (as defined by 33 CFR part 329) in the review area.

• Complete Table 1 - Required

NOTE: If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Section 10 navigable waters list, DO NOT USE THIS FORM TO MAKE THE DETERMINATION. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Section 10 RHA navigability determination.

B. CLEAN WATER ACT (CWA) SECTION 404 DETERMINATION OF JURISDICTION: "waters of the U.S." within CWA jurisdiction (as defined by 33 CFR part 328.3) in the review area. Check all that apply.

- (a)(1): All waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide. (Traditional Navigable Waters (TNWs))

• Complete Table 1 - Required

- This AJD includes a case-specific (a)(1) TNW (Section 404 navigable-in-fact) determination on a water that has not previously been designated as such. Documentation required for this case-specific (a)(1) TNW determination is attached.

- (a)(2): All interstate waters, including interstate wetlands.

• Complete Table 2 - Required

- (a)(3): The territorial seas.

• Complete Table 3 - Required

- (a)(4): All impoundments of waters otherwise identified as waters of the U.S. under 33 CFR part 328.3.

• Complete Table 4 - Required

- (a)(5): All tributaries, as defined in 33 CFR part 328.3, of waters identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.

• Complete Table 5 - Required

- (a)(6): All waters adjacent to a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3, including wetlands, ponds, lakes, oxbows, impoundments, and similar waters.

• Complete Table 6 - Required

- Bordering/Contiguous.
Neighboring:

- (c)(2)(i): All waters located within 100 feet of the ordinary high water mark (OHWM) of a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3.

- (c)(2)(ii): All waters located within the 100-year floodplain of a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3 and not more than 1,500 feet of the OHWM of such water.

- (c)(2)(iii): All waters located within 1,500 feet of the high tide line of a water identified in paragraphs (a)(1) or (a)(3) of 33 CFR part 328.3, and all waters within 1,500 feet of the OHWM of the Great Lakes.

- (a)(7): All waters identified in 33 CFR 328.3(a)(7)(i)-(v) where they are determined, on a case-specific basis, to have a significant nexus to a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.

• Complete Table 7 for the significant nexus determination. Attach a map delineating the SPOE watershed boundary with (a)(7) waters identified in the similarly situated analysis. - Required

- Includes water(s) that are geographically and physically adjacent per (a)(6), but are being used for established, normal farming, silviculture, and ranching activities (33 USC Section 1344(f)(1)) and therefore are not adjacent and require a case-specific significant nexus determination.

- (a)(8): All waters located within the 100-year floodplain of a water identified in paragraphs (a)(1)-(a)(3) of 33

CFR part 328.3 not covered by (c)(2)(ii) above and all waters located within 4,000 feet of the high tide line or OHWM of a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3 where they are determined on a case-specific basis to have a significant nexus to a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.

• **Complete Table 8 for the significant nexus determination. Attach a map delineating the SPOE watershed boundary with (a)(8) waters identified in the similarly situated analysis. - Required**

Includes water(s) that are geographically and physically adjacent per (a)(6), but are being used for established, normal farming, silviculture, and ranching activities (33 USC Section 1344(f)(1)) and therefore are not adjacent and require a case-specific significant nexus determination.

C. NON-WATERS OF THE U.S. FINDINGS:

Check all that apply.

The review area is comprised entirely of dry land.

Potential-(a)(7) Waters: Waters that DO NOT have a significant nexus to a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.

• **Complete Table 9 and attach a map delineating the SPOE watershed boundary with potential (a)(7) waters identified in the similarly situated analysis. - Required**

Includes water(s) that are geographically and physically adjacent per (a)(6), but are being used for established, normal farming, silviculture, and ranching activities (33 USC Section 1344(f)(1)) and therefore are not adjacent and require a case-specific significant nexus determination.

Potential-(a)(8) Waters: Waters that DO NOT have a significant nexus to a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.

• **Complete Table 9 and attach a map delineating the SPOE watershed boundary with potential (a)(8) waters identified in the similarly situated analysis. - Required**

Includes water(s) that are geographically and physically adjacent per (a)(6), but are being used for established, normal farming, silviculture, and ranching activities (33 USC Section 1344(f)(1)) and therefore are not adjacent and require a case-specific significant nexus determination.

Excluded Waters (Non-Waters of U.S.), even where they otherwise meet the terms of paragraphs (a)(4)-(a)(8):

• **Complete Table 10 - Required**

(b)(1): Waste treatment systems, including treatment ponds or lagoons designed to meet the requirements of the CWA.

(b)(2): Prior converted cropland.

(b)(3)(i): Ditches with ephemeral flow that are not a relocated tributary or excavated in a tributary.

(b)(3)(ii): Ditches with intermittent flow that are not a relocated tributary, excavated in a tributary, or drain wetlands.

(b)(3)(iii): Ditches that do not flow, either directly or through another water, into a water identified in paragraphs (a)(1)-(a)(3).

(b)(4)(i): Artificially irrigated areas that would revert to dry land should application of water to that area cease.

(b)(4)(ii): Artificial, constructed lakes and ponds created in dry land such as farm and stock watering ponds, irrigation ponds, settling basins, fields flooded for rice growing, log cleaning ponds, or cooling ponds.

(b)(4)(iii): Artificial reflecting pools or swimming pools created in dry land.¹

(b)(4)(iv): Small ornamental waters created in dry land.¹

(b)(4)(v): Water-filled depressions created in dry land incidental to mining or construction activity, including pits excavated for obtaining fill, sand, or gravel that fill with water.

(b)(4)(vi): Erosional features, including gullies, rills, and other ephemeral features that do not meet the definition of tributary, non-wetland swales, and lawfully constructed grassed waterways.¹

(b)(4)(vii): Puddles.¹

(b)(5): Groundwater, including groundwater drained through subsurface drainage systems.¹

(b)(6): Stormwater control features constructed to convey, treat, or store stormwater that are created in dry land.¹

(b)(7): Wastewater recycling structures created in dry land; detention and retention basins built for wastewater recycling; groundwater recharge basins; percolation ponds built for wastewater recycling; and water distributary structures built for wastewater recycling.

Other non-jurisdictional waters/features within review area that do not meet the definitions in 33 CFR 328.3 of (a)(1)-(a)(8) waters and are not excluded waters identified in (b)(1)-(b)(7).

• **Complete Table 11 - Required.**

¹ In many cases these excluded features will not be specifically identified on the AJD form, unless specifically requested. Corps Districts may, in case-by-case instances, choose to identify some or all of these features within the review area.

D. ADDITIONAL COMMENTS TO SUPPORT AJD: The approximately 20-acre study area consists of disturbed annual brome grassland with a few notable exceptions. In the western quarter of the study area, there is an existing paved roadway with a landscaped area to the south, and active construction to the north. Union Pacific railroad tracks and Industrial Avenue run north to south through the approximate center of the study area. Lastly, parking lots, adjacent landscaping, roadways, and a paved and fenced industrial yard encroach onto the edges of the eastern half of the study area.

On March 10, 2006, the Corps issued an approved jurisdictional determination (AJD) for the Foothills Distribution Center project (SPK-2005-00842), which covers a majority of the Roseville Parkway Extension project and current study area. In the 2006 AJD, no aquatic resources were present within the current study area. In 2011, the 2006 AJD expired. On October 5, 2006, the Corps issued a NWP 29 verification for the Foothills Distribution Center project. The project was re-verified under NWP 29 on November 29, 2012. From 2013 to 2016 a portion of the Foothills Distribution Center project was constructed on the site and also within the Roseville Parkway Extension project site, which led to the formation of several of the aquatic features under examination within the study area.

A majority of the western annual brome grassland area was disturbed by mass grading (permitted) in 2013 thru 2016, which is when the detention basin and associated ditch were constructed. In 2016, mass grading left a number of depressions that have developed into shallow seasonal wetlands. The eastern annual brome grassland has a number of spoils piles, debris piles, and scraped areas, which appear to have been deposited during construction of the adjacent buildings, which occurred sometime between 1998 and 2002 (Google Earth 2019).

According to historic aerial photographs, stormwater control features DB-1 and DD-2 were constructed in dry land in 2014 and DD-1 was constructed in dry land in 2016. Seasonal wetland water-filled depressions SW-1, 2 & 3 were created in dry land incidental to construction activities occurring in 2013-2014. Artificially irrigated areas IW-1, 2, 3, 4 & 5, which would revert to dry land should application of water to those areas cease, were created between 1998 and 2003 as a result of artificial irrigation runoff from adjacent development. Artificially irrigated area SWS-1, would revert to dry land should application of water to the area cease, was created in 2013 as a result of artificial irrigation runoff from adjacent development

Surface water within the study area is driven by rainfall, outfalls from the adjacent industrial buildings, and irrigation runoff. Water from DD-1 drains into the municipal storm drain system. Water from DB-1 and DD-2 appears to infiltrate or evaporate unless there are extreme storm events that fill the basin, at which point overflow would go into a drop inlet, which goes to the municipal storm drain system. Seasonal wetlands 1-5 would overflow towards seasonal wetland swale 1, which drains north into a culvert under the railroad tracks, and leads to the municipal storm drain system. No natural drainages are present. The study area is surrounded entirely by industrial development or roadways, and excess runoff from an extreme storm event is expected to drain to the municipal storm drain system.

Jurisdictional Waters of the U.S.

Table 1. (a)(1) Traditional Navigable Waters

(a)(1) Waters Name	(a)(1) Criteria	Rationale to Support (a)(1) Designation Include High Tide Line or Ordinary High Water Mark indicators, when applicable.

N/A	N/A	N/A

Table 7. (a)(7) Waters

SPOE Name	(a)(7) Waters Name	(a)(1)-(a)(3) Water Name to which this Water has a Significant Nexus	Significant Nexus Determination Identify SPOE watershed; discuss whether any similarly situated waters were present and aggregated for SND; discuss data, provide analysis, and summarize how the waters have more than speculative or insubstantial effect on the physical, chemical, or biological integrity of the (a)(1)-(a)(3) water, etc.
N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A

Table 8. (a)(8) Waters

SPOE Name	(a)(8) Waters Name	(a)(1)-(a)(3) Water Name to which this Water has a Significant Nexus	Significant Nexus Determination Identify SPOE watershed; explain how 100-yr floodplain and/or the distance threshold was determined; discuss whether waters were determined to be similarly situated to subject water and aggregated for SND; discuss data, provide analysis, and then summarize how the waters have more than speculative or insubstantial effect the on the physical, chemical, or biological integrity of the (a)(1)-(a)(3) water, etc.
N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A

Non-Jurisdictional Waters

Table 9. Non-Waters/No Significant Nexus

SPOE Name	Non-(a)(7)/(a)(8) Waters Name	(a)(1)-(a)(3) Water Name to which this Water DOES NOT have a Significant Nexus	Basis for Determination that the Functions DO NOT Contribute Significantly to the Chemical, Physical, or Biological Integrity of the (a)(1)-(a)(3) Water. Identify SPOE watershed; explain how 100-yr floodplain and/or the distance threshold was determined; discuss whether waters were determined to be similarly situated to the subject water; discuss data, provide analysis, and summarize how the waters did not have more than a speculative or insubstantial effect on the physical, chemical, or biological integrity of the (a)(1)-(a)(3) water.
N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A

Table 10. Non-Waters/Excluded Waters and Features

Paragraph (b) Excluded Feature/Water Name	Rationale for Paragraph (b) Excluded Feature/Water and Additional Discussion.
DB-1	This feature is an excluded (b)(6) non-water of the U.S. The evaluated feature is a manmade stormwater detention basin or control feature, constructed to convey, treat, or store stormwater, and was created in dry land.
DD-1	This feature is an excluded (b)(6) non-water of the U.S. The evaluated feature is a manmade stormwater drain or control feature, constructed to convey, treat, or store stormwater, and was created in dry land.
DD-2	This feature is an excluded (b)(6) non-water of the U.S. The evaluated feature is a manmade stormwater drain or control feature, constructed to convey, treat, or store stormwater, and was created in dry land.
SWS-1	This feature is an excluded (b)(4)(i) non-water of the U.S. The evaluated feature is an artificially irrigated area that would revert to dry land should application of water to the area cease. Wetland characteristics would not persist, absent irrigation.
IW-1	This feature is an excluded (b)(4)(i) non-water of the U.S. The evaluated feature is an artificially irrigated area that would revert to dry land should application of water to the area cease. Wetland characteristics would not persist, absent irrigation.
IW-2	This feature is an excluded (b)(4)(i) non-water of the U.S. The evaluated feature is an artificially irrigated area that would revert to dry land should application of water to the area cease. Wetland characteristics would not persist, absent irrigation.
IW-3	This feature is an excluded (b)(4)(i) non-water of the U.S. The evaluated feature is an artificially irrigated area that would revert to dry land should application of water to the area cease. Wetland characteristics would not persist, absent irrigation.
IW-4	This feature is an excluded (b)(4)(i) non-water of the U.S. The evaluated feature is an artificially irrigated area that would revert to dry land should application of water to the area cease. Wetland characteristics would not persist, absent irrigation.
IW-5	This feature is an excluded (b)(4)(i) non-water of the U.S. The evaluated feature is an artificially irrigated area that would revert to dry land should application of water to the area cease. Wetland characteristics would not persist, absent irrigation.
SW-1	This feature is an excluded (b)(4)(v) non-water of the U.S. The evaluated feature is a small water-filled depression, created in dry land incidental to construction activities.
SW-2	This feature is an excluded (b)(4)(v) non-water of the U.S. The evaluated feature is a small water-filled depression, created in dry land incidental to construction activities.
SW-3	This feature is an excluded (b)(4)(v) non-water of the U.S. The evaluated feature is a small water-filled depression, created in dry land incidental to construction activities.

Table 11. Non-Waters/Other

Other Non-Waters of U.S. Feature/Water Name	Rationale for Non-Waters of U.S. Feature/Water and Additional Discussion.
N/A	N/A
