

## U.S. ARMY CORPS OF ENGINEERS REGULATORY PROGRAM APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM) NAVIGABLE WATERS PROTECTION RULE

## I. ADMINISTRATIVE INFORMATION

Completion Date of Approved Jurisdictional Determination (AJD): 04-MAR-2021

ORM Number: SPK-2020-00665

Associated JDs: N/A Review Area Location1:

State/Territory: NV City: Henderson County: Clark County

Center Coordinates of Review Area: Latitude 35.957652 Longitude -115.144914

<ul> <li>The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rational</li> <li>There are "navigable waters of the United States" within Rivers and Harbors Act jurisdiction within the review area (complete table in section II.B).</li> <li>There are "waters of the United States" within Clean Water Act jurisdiction within the review area (complete appropriate tables in section II.C).</li> <li>There are waters or water features excluded from Clean Water Act jurisdiction within the rev area (complete table in section II.D).</li> </ul>

<sup>&</sup>lt;sup>1</sup> Map(s)/Figure(s) are attached to the AJD provided to the requestor.

<sup>&</sup>lt;sup>2</sup> If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

<sup>&</sup>lt;sup>3</sup> A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where independent upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD form.

<sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps Districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

<sup>&</sup>lt;sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

## D. Excluded Waters or Features

Excluded waters  $((b)(1) - (b)(12))^4$ :

<b>Exclusion Name</b>	Exclusion Size	Exclusion <sup>5</sup>	Rationale for Exclusion Determination
UT-1 Duck Creek	0.215 acre/1586 feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool	Aerial imagery, ground photos, xeric vegetation within the channel (i.e. upland species in the washes such as catclaw (Senegalia greggii) and galleta grass (Pleuraphis rigida), the lack of hydrophytic and facultative shrub species typical of intermittent streams in this area (e.g., willows, tamarisk, mule-fat, etc.) are absent on this stream indicating water availability is insufficient to support these species. Best available data indicates this feature does not flow except in direct response to precipitation events. As such, the feature meets the criteria of a (b)(3) water as defined in paragraph (c)(3).
UT-2 Duck Creek	0.011 acre/183 feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool	Aerial imagery, ground photos, xeric vegetation within the channel (i.e. upland species in the washes such as catclaw (Senegalia greggii) and galleta grass (Pleuraphis rigida), the lack of hydrophytic and facultative shrub species typical of intermittent streams in this area (e.g., willows, tamarisk, mule-fat, etc.) are absent on this stream indicating water availability is insufficient to support these species. Best available data indicates this feature does not flow except in direct response to precipitation events. As such, the feature meets the criteria of a (b)(3) water as defined in paragraph (c)(3).

### III. SUPPORTING INFORMATION

Α.	Select/enter all resources that were used to aid in this determination and attach data/maps to this
	document and/or references/citations in the administrative record, as appropriate.

0.00.	and an analysis is a second contained in the distribution of the contained and an analysis of the contained in the contained and an analysis of the contained in the contained and an analysis of the
_X_	Information submitted by, or on behalf of, the applicant/consultant: Jurisdictional Delineation
_	Report, DP Henderson Volunteer, August 2020.
	This information is sufficient for purposes of this AJD.
	Rationale: N/A
	Data sheets prepared by the Corps: N/A
	Photographs: N/A
	Corps Site visit(s) conducted on N/A
	Previous Jurisdictional Determinations (AJDs or PJDs): N/A
	Antecedent Precipitation Tool: provide detailed discussion in Section III.B.

	USFWS NWI maps: N/A
	USGS topographic maps: N/A

<sup>&</sup>lt;sup>1</sup> Map(s)/Figure(s) are attached to the AJD provided to the requestor.

<sup>&</sup>lt;sup>2</sup> If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

<sup>&</sup>lt;sup>3</sup> A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where independent upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD form.

<sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps Districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

<sup>&</sup>lt;sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
