

Regional General Permit 7

U.S. ARMY CORPS OF ENGINEERS

BUILDING STRONG®

Construction and Maintenance of Flood Control Facilities under the Clark County Regional Flood Control District Master Plan

EFFECTIVE: March 20, 2024

EXPIRES: March 20, 2029

The U.S. Army Corps of Engineers, Sacramento District, hereby issues Regional General Permit (RGP) 7 authorizing discharges of dredged or fill material into waters of the United States (U.S.), including wetlands, to construct and maintain flood control facilities under the Clark County Regional Flood Control District (CCRFCD) Master Plan, as updated, within Clark County, Nevada.

Note: The term “you” and its derivatives, as used in this RGP, means the permittee or any future transferee. The term “this office” refers to the U.S. Army Corps of Engineers, Sacramento District, as identified in the *Contacts and Additional Information* section below.

ISSUING OFFICE: U.S. Army Corps of Engineers, Sacramento District

ACTION ID: SPK-2007-00300

AUTHORITIES: Section 404 of the Clean Water Act for the discharge of dredged or fill material in waters of the U.S.

LOCATION: Within the geographic boundaries of the CCRFCD Master Plan, Clark County, Nevada.

AUTHORIZED ACTIVITIES: This RGP may be used to authorize activities in waters of the U.S. involving permanent and temporary discharges of dredged or fill material into waters of the U.S., including wetlands, associated with the construction or maintenance of flood control facilities funded by or constructed in accordance with the CCRFCD Master Plan.

In accordance with 33 CFR 322.2(f)(1) and 33 CFR 323.2(h)(1), this permit authorizes activities that are substantially similar in nature and cause only minimal individual and cumulative environmental impacts, when conducted under the terms and conditions of this permit.

TERMS:

1. The category of activities authorized below are limited to the acreage and linear foot thresholds and are subject to the following activity restrictions, unless this office, in consultation with the reviewing state and federal agencies, waives the criterion by making a written determination concluding that the activity will result in no more than minimal adverse impacts on the aquatic environment.

a) Within the Las Vegas Valley Urban Boundary (Figure 1): The discharge of dredged or fill material as a result of the proposed activity shall not exceed 1 acre of wetland, and 5,000 linear feet of relatively permanent waters.

b) Within Laughlin, the City of Mesquite, and the Boulder City Urban Boundary (Figures 2, 3, and 4): The discharge of dredged or fill material associated with the proposed activity shall not exceed 0.5 acre of wetlands and 500 linear feet of relatively permanent waters. The following activities are not authorized without an activity specific waiver: construction or expansion of channelization, conversion to underground pipe, ditch lining, realignment of streams and ditches, or construction of new in-stream detention basins.

c) Within the Muddy River Planning Area (Figure 5) and within the Virgin River: The total discharge of dredged or fill material associated with proposed activity shall not exceed 0.5 acre of wetlands and 500 linear feet of relatively permanent waters. Subject to approval by this office, this limitation may be increased to 1,000 linear feet, provided appropriate bioengineering techniques (e.g., willow plantings, root wads, large woody debris, or equivalent techniques) are incorporated into the activity design. The following activities are not authorized without an activity specific waiver: construction or expansion of channelization, conversion to underground pipe, ditch lining, realignment of streams and ditches, or construction of new in-stream detention basins.

d) In all other areas within Clark County: The discharge of dredged or fill material as a result of the proposed activity shall not exceed 0.1 acre of wetlands and 500 linear feet of relatively permanent waters.

GENERAL CONDITIONS:

1. You shall submit a Pre-Construction Notification (PCN) to this office prior to initiating work in Waters of the United States authorized by this permit, in accordance with the PCN Procedures below.
2. You must receive written verification from this office that the activity is authorized under this RGP prior to initiating any work in waters of the U.S.
3. You shall comply with any activity-specific special conditions that are included in this office's written verification of authorization.

U.S. Army Corps of Engineers, Sacramento District

1325 J Street, Sacramento, CA 95814-2922

<http://www.spk.usace.army.mil/organizations/cespk-co/regulatory/index.html>

4. Where the certifying authority has not previously certified compliance of this RGP with CWA Section 401, individual water quality certification for the proposed discharge must be obtained or waived. If the certifying authority issues an individual water quality certification for the proposed discharge, you must submit a copy of the certification to this office. The discharge is not authorized until this office has notified you that the water quality certification requirement has been satisfied by the issuance of a water quality certification or a waiver.

5. This office will determine the need for appropriate and practicable compensatory mitigation necessary to ensure that adverse effects on the aquatic environment are minimal. Compensatory mitigation may be required for permanent or temporary discharges of dredged or fill material that convert waters of the United States to non-waters of the United States. Where certain functions and services of waters of the United States are permanently adversely affected by a regulated activity, such as discharges of dredged or fill material into waters of the United States that would convert a forested or scrub-shrub wetland to an herbaceous wetland in a permanently maintained utility right-of-way, mitigation may be required to reduce the adverse environmental effects of the activity to a no more than minimal level. You may propose the use of mitigation banks, in-lieu fee programs, or permittee-responsible mitigation. When developing a compensatory mitigation proposal, you must consider appropriate and practicable options consistent with the framework at 33 CFR 332.3(b). Compensatory mitigation proposals designed to offset permanent adverse effects to aquatic resource functions and services must comply with the applicable provisions of 33 CFR Part 332.

6. Activities in waters of the U.S. that serve as breeding areas for migratory birds must be avoided to the maximum extent practicable. You are responsible for ensuring the activity complies with the Migratory Bird Treaty Act and the Bald and Golden Eagle Protection Act. You are responsible for contacting the appropriate local office of the U.S. Fish and Wildlife Service to determine applicable measures to reduce impacts to migratory birds or eagles, including whether “incidental take” permits are necessary.

7. For areas outside of the Las Vegas Urban Boundary, no activity is authorized which may directly or indirectly jeopardize the continued existence of a threatened or endangered species or a species proposed for such designation, as identified under the Federal Endangered Species Act (ESA), or which will directly or indirectly destroy or adversely modify designated critical habitat or critical habitat proposed for such designation. No activity is authorized which “may affect” a listed species or critical habitat unless ESA section 7 consultation addressing the consequences of the proposed activity on listed species or critical habitat has been completed. See 50 CFR 402.02 for the definition of “effects of the action” for the purposes of ESA section 7 consultation, as well as 50 CFR 402.17, which provides further explanation under ESA section 7 regarding “activities that are reasonably certain to occur” and “consequences caused by the proposed action.” Authorization of an activity by this RGP does not authorize the “take” of a threatened or endangered species as defined under the ESA. In the absence of separate authorization

(e.g., an ESA Section 10 Permit, a Biological Opinion with “incidental take” provisions, etc.) from the FWS or the NMFS, the ESA prohibits any person subject to the jurisdiction of the United States to take a listed species, where “take” means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. The word “harm” in the definition of “take” means an act which actually kills or injures wildlife. Such an act may include significant habitat modification or degradation where it actually kills or injures wildlife by significantly impairing essential behavioral patterns, including breeding, feeding or sheltering. Information on the location of threatened and endangered species and their critical habitat can be obtained directly from the offices of the FWS and NMFS or their web pages at: <http://www.fws.gov/> or <http://www.fws.gov/ipac> and <http://www.nmfs.noaa.gov/pr/species/esa/>.

8. No activity which may affect historic properties listed, or eligible for listing in the National Register of Historic Places is authorized under this RGP until the requirements of Section 106 of the National Historic Preservation Act (NHPA) have been satisfied. If you discover any previously unknown historic or archeological remains while accomplishing the activity authorized by this RGP, you must stop work and immediately notify this office of what you have found. We will initiate the federal and state coordination required to determine if the remains warrant a recovery effort or if the site is eligible for listing in the National Register of Historic Places.

9. No activity or its operation may impair reserved tribal rights, including, but not limited to, reserved water rights and treaty fishing and hunting rights. You are not authorized to initiate any activities in waters of the U.S. that have the potential to impair tribal rights under this RGP until this office has completed necessary tribal coordination/consultation or has determined the proposed action does not impair tribal rights, unless tribal coordination/consultation is addressed programmatically (e.g., by a Programmatic Agreement).

10. You are responsible for all authorized work and ensuring that all contractors and workers are made aware and adhere to the terms and conditions of the permit authorization, including any activity-specific special conditions included in the permit verification. You shall ensure that a copy of the verification and associated drawings are available and visible for quick reference at the site until all construction activities are completed.

11. Unless determined to be not practicable or appropriate by this office, for activities that result in the discharge of dredged or fill material into waters of the U.S., you must employ construction Best Management Practices (BMPs) on-site prior to the initiation of construction activities in waters of the U.S., to prevent degradation to on-site and off-site waters of the U.S. Methods and techniques shall include the use of appropriate measures to intercept and capture sediment prior to entering waters of the U.S., as well as erosion control measures along the perimeter of all work areas to prevent the displacement of fill material. All BMPs shall be in place prior to initiation of any construction activities and shall

remain until construction activities are completed. You shall ensure all BMPs are inspected on a weekly basis and are maintained until construction activities are completed and site soils are stabilized.

12. For activities in waters of the U.S., you must clearly identify the limits of the authorized activity in the field with highly visible markers (e.g., construction fencing, flagging, silt barriers, etc.) prior to commencement of construction activities within waters of the U.S. You shall maintain such identification properly until construction is completed, and the soils have been stabilized.

13. Heavy equipment entering or working in waters of the U.S. must be thoroughly cleaned, free of leaks, and placed on mats, to the extent practicable and appropriate. You will implement any other appropriate and practicable measures to minimize soil and vegetation compaction or disturbance. These measures may include but are not limited to, the use of wide-treaded/low ground-pressure equipment or other devices that minimize impacts to soil and vegetation.

14. Material used for construction or discharged into waters of the U.S. must be free of toxic pollutants in toxic amounts as well as free of noxious vegetation. Fresh cement or concrete is not allowed in waters unless it is placed in sealed forms. No activity may use unsuitable material. Unsuitable fill material includes trash, vehicle bodies, farm machinery, appliances and other metal objects, asphalt, biodegradable construction debris and tires, concrete with exposed rebar.

15. For all access, staging, and construction activities resulting in the discharge of dredged or fill material within waters of the U.S., you shall:

a. Install a horizontal marker (e.g., fabric, certified weed free straw, etc.) to delineate the existing bottom elevation of the waters of the U.S. prior to the placement temporary fill in waters of the U.S.; and

b. Remove all temporary structures, work, and fills in their entirety within 30 days following completion of construction activities in waters of the U.S. authorized by this RGP. You shall return any area affected by temporary construction, dewatering, or access work, including staging areas, to their pre-construction contours and conditions and shall re-vegetate with appropriate native vegetation common to the area, during the first optimal germination growing season following completion of construction activities in waters of the U.S. authorized by this RGP.

16. Any authorized structure or fill shall be properly maintained, including maintenance to ensure public safety and compliance with applicable RGP general conditions, as well as any special conditions added by the district engineer to the RGP verification. You shall obtain any required authorization for any maintenance activities prior to conducting the maintenance. You are not relieved of this requirement if you abandon the permitted activity or sell the property associated with this permit. If you wish to cease to maintain the

authorized activity or desire to abandon it, you must obtain appropriate authorization from this office, which may require restoration of the area.

17. If the structures or work authorized by this RGP permit are still in existence at the time you sell or otherwise transfer the property associated with this permit, the terms and conditions of this RGP permit, including any special conditions included in the RGP verification, will continue to be binding on the new owner(s) of the property. To validate the transfer of this RGP permit and the associated liabilities associated with compliance with its terms and conditions, you must obtain the signature and mailing address of the new owner on the permit verification letter and forward a copy to this office to validate the transfer.

18. You shall allow representatives from this office to inspect the authorized activity and any compensatory mitigation areas at any time deemed necessary to ensure that the activity is being or has been accomplished in accordance with the terms and conditions of this RGP.

19. You shall provide a written report to this office, within 90 days following completion of construction activities in waters of the U.S. authorized by this RGP, or within 30 days following restoration of temporary fill areas as required by General Condition 11. The report shall include the following:

a. A complete description of the work completed, including any deviations from the activities in waters of the U.S. authorized by this RGP, and the reason(s) for the deviations;

b. Drawings of the authorized work, including any on-site and/or off-site permittee responsible compensatory mitigation. This will include a plan-view drawing showing all areas of ground disturbance, aquatic resource impacts, structures, and the boundaries of any on-site and/or off-site mitigation or avoidance areas. Please note that any deviations from the work as authorized, which result in additional impacts to waters of the U.S. requiring authorization, must be coordinated with the appropriate office prior to impacts;

c. A description of all temporary fill areas restored to pre-activity contours and conditions, as required by General Condition 11, including photo-documentation of the horizontal marker installed. For temporary fill areas within waters of the U.S. that have not been restored to pre- activity contours or conditions, a description and photo-documentation of the temporary fill within waters of the U.S., including information on why restoration has not been completed.

PRECONSTRUCTION NOTIFICATION PROCEDURES: A PCN must be submitted to this office in electronic format (pdf) through email (less than 40 MB) or posting to a Corps-accessible FTP site (e.g., DoD SAFE). Email submittals should be sent to: SPKRegulatoryMailbox@usace.army.mil. The PCN shall include a letter or a completed Department of the Army Permit Application Form (ENG 4345), requesting authorization under this RGP, and shall contain the following information to be considered complete:

U.S. Army Corps of Engineers, Sacramento District

1325 J Street, Sacramento, CA 95814-2922

<http://www.spk.usace.army.mil/organizations/cespk-co/regulatory/index.html>

1. The name, address, telephone number (and email address, if available) of the prospective permittee and any designated agent, including contractors;
2. The location of the proposed activity, including identification of the affected water(s) and the latitude and longitude of the approximant center point of the activity. The activity boundaries should be depicted on a copy of a U.S. Geologic Survey topographic map, or other location map with sufficient detail to clearly identify the exact location and extent of the activity. Detailed directions to the activity site should also be provided. Unless specifically waived by this office, all drawings will follow the South Pacific Division February 2016, *Updated Map and Drawing Standards for the South Pacific Division Regulatory Program*, or most recent update (available on the South Pacific Division website at: <http://www.spd.usace.army.mil/Missions/regulatory/PublicNoticesandReferences.aspx/>);
3. A delineation of aquatic resources on the activity site. Aquatic resource delineations must be prepared in accordance with the current method required by this office and aquatic resources delineation reports shall be in a format that complies with the Sacramento District's *Minimum Standards for Acceptance of Aquatic Resource Delineation Reports* (January, 2016), which is accessible at: http://www.spk.usace.army.mil/Portals/12/documents/regulatory/jd/minimum-standards/Minimum_Standards_for_Delineation_with_Template-final.pdf;
4. A description of existing conditions at the activity site, including a description of each aquatic resource proposed to be impacted. The description must include proposed temporary and permanent impact amounts (in acreage and in linear feet), aquatic resource and riparian buffer condition pre-existing impacts, and an assessment of aquatic resource functions and services that would be affected.
5. Numbered and dated pre-activity color photographs showing a representative sample of waters proposed to be impacted on the site and all waters of the United States proposed to be avoided on and immediately adjacent to the activity site. The compass angle and position of each photograph shall be identified on the plan-view drawing(s);
6. A description of alternative design options that were considered to achieve the activity's purpose, and demonstration that the proposed activity would avoid and minimize impacts to the maximum extent practicable.
7. A description of the proposed activity; the activity's purpose and direct and indirect adverse environmental effects that the activity would cause. Include the total area of waters of the United States to be permanently and temporarily directly affected, including acreage and linear feet for stream/drainage impacts and acreage for wetland impacts. This includes all areas at or below the ordinary high water mark (OHWM) of a drainage and the adjacent wetlands. The OHWM should be clearly marked on a cross section view.

8. A description of the total area of waters of the United States to be indirectly affected (reported in linear feet and acreage), including a description of nearby upstream waters that would be captured by or brought into the flood control infrastructure or otherwise affected by the activity and/or any downstream areas that would have flows reduced/eliminated as a result of the activity. For temporary fill in waters of the U.S., include the proposed plan for restoration of the temporary fill area to pre-activity contours and conditions, and the reason(s) why avoidance of temporary impacts is not practicable.

9. The volume and type of material to be placed into waters of the United States, including the area (in acres) of waters of the U.S. that would be filled;

10. If you are requesting a waiver on the type of activities authorized in specific geographic areas, as specified in Term 1(b-c) (above), your PCN must include the following information to support the waiver request:

a. The impact threshold and/or activity type proposed to be waived;

b. A narrative and photographic description of the aquatic resources that would be impacted by the proposed activity;

c. Rationale describing why there are no practicable alternatives to the proposed discharge requiring a waiver, including consideration of other methods of constructing the proposed activity;

d. Description of any design elements and/or mitigation measures intended to reduce the adverse environmental impacts caused by the proposed activity; and

e. Rationale describing why issuance of such a waiver would not result in more than minimal adverse environmental impacts.

11. A description of measures proposed to be taken to avoid and minimize impacts to the aquatic environment to the maximum extent practicable. The information shall include a description of alternatives that were considered to achieve the activity purpose while resulting in fewer impacts to native habitat and adjacent vegetated buffers.

12. If no compensatory mitigation is proposed, you must explain why the adverse environmental effects are no more than minimal and why compensatory mitigation should not be required. If compensatory mitigation is proposed, a mitigation proposal shall be prepared in accordance with 33 CFR Part 332 and the South Pacific Division's *Final 2015 Regional Compensatory Mitigation and Monitoring Guidelines* (which can be accessed at <http://www.spd.usace.army.mil/Portals/13/docs/regulatory/mitigation/MitMon.pdf>).

13. For activities within the Las Vegas Valley Urban Boundary and/or Boulder City Urban Boundary you should provide a Section 8 Facility Specific Analysis (Section 8), conducted

in accordance with the Bureau of Land Management's *Clark County Regional Flood Control District Flood Control Master Plan Final Environmental Impact Statement* (FEIS) (1990) and the *Supplemental Programmatic Environmental Impact Statement Clark County Regional Flood Control District 2002 Master Plan Update* (SEIS) (2004). In accordance with the FEIS and SEIS, a Section 8 analysis or comparable Facility Specific Analysis must be prepared for all new construction authorized under this RGP. For new construction outside of the SEIS activity area, a comparable site-specific impact analysis incorporating all elements in Section 8 of the EIS will be submitted to this office.

14. Plan view and cross-section view drawings, clearly depicting the location, size and dimensions of the proposed activity, as well as the location of delineated waters of the U.S. on the site. The drawings shall contain a title block, legend and scale, amount (in cubic yards) and area (in acres) of fill in Corps jurisdiction, including both permanent and temporary fills/structures. The OHWM must be shown on all applicable drawings (in feet), based on National Geodetic Vertical Datum (NGVD) or other appropriate referenced elevation.

15. A cultural resources report that contains the required information outlined in the *Sacramento District's Regulatory Program Guidelines for Compliance with Section 106 of the National Historic Preservation Act* (available at http://www.spk.usace.army.mil/Portals/12/documents/regulatory/sec-106-tribal/FINAL_2014-03-24_Section-106-Guidelines.pdf) or documentation demonstrating that another Federal Agency, acting as lead, has determined the activity is compliant with Section 106 of the National Historic Preservation Act. Alternatively, you may provide documentation demonstrating, subject to this office's review and concurrence, that the activity does not have potential to affect historic properties due to one of the reasons identified in 33 CFR Part 325, Appendix C, Section 3(b) (1-3);

16. Dewatering plan, if applicable;

17. Proposed construction schedule

Review Process:

1. Upon receipt of your PCN, this office will determine if the PCN is complete within 15 calendar days of the date of receipt. If the PCN is determined to be incomplete, we will notify you within 15 days to request the additional information necessary to make the PCN complete. Generally, we will request additional information necessary to make the PCN complete only once. However, if you do not provide all the requested information, then we will notify you that the PCN is still incomplete and the PCN review process will not commence until all of the requested information has been received.

U.S. Army Corps of Engineers, Sacramento District

1325 J Street, Sacramento, CA 95814-2922

<http://www.spk.usace.army.mil/organizations/cespk-co/regulatory/index.html>

2. For activities resulting in the discharge of dredged or fill material into more than 0.5-acre of wetlands or 500 linear feet of waters of the U.S, this office will notify the applicable state and federal permitting agencies of the proposed PCN by email and request comments within ten (10) calendar days of receipt of the email notice. This office may extend the comment period at the request of a reviewing agency due to extenuating circumstances, by no more than seven (7) calendar days and will also initiate consultation(s) as necessary with the permitting agencies and/or tribes. Any problems identified during the notification process with the state and federal review agencies will be resolved before a written verification is made.
3. For activities that do not require consultation under Section 7 of the Endangered Species Act or Section 106 of the National Historic Preservation Act, the activity is authorized when a complete notification has been submitted to this office, and you have not received a response from this office within 45 calendar days. For activities that require consultation under Section 7 of the Endangered Species Act or Section 106 of the National Historic Preservation Act, you shall not initiate construction activities in waters of the U.S. under this permit until you have been notified by this office that the activity is authorized, subject to the terms and condition of this RGP, and any special conditions added to the authorization. .
4. Once this office has determined that the activity complies with the terms and conditions of this RGP, you will receive written verification from this office that the activity is authorized, subject to the terms and conditions of this RGP and the special conditions placed on the verification.

FURTHER INFORMATION:

1. Congressional Authorities: You have been authorized to undertake the activity described above pursuant to: Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403), and/or Section 404 of the Clean Water Act (33 U.S.C. 1344), and/or Section 103 of the Marine Protection, Research and Sanctuaries Act of 1972 (33 U.S.C. 1413).
2. Limits of this authorization:
 - a. This permit does not obviate the need to obtain other federal, state, or local authorizations required by law.
 - b. This permit does not grant any property rights or exclusive privileges.
 - c. This permit does not authorize any injury to the property or rights of others.
 - d. This permit does not authorize interference with any existing or proposed federal projects.
3. Limits of Federal Liability. In issuing this permit, the Federal Government does not assume any liability for the following:

U.S. Army Corps of Engineers, Sacramento District

1325 J Street, Sacramento, CA 95814-2922

<http://www.spk.usace.army.mil/organizations/cespk-co/regulatory/index.html>

- a. Damages to the permitted project or uses thereof as a result of other permitted or unpermitted activities or from natural causes.
 - b. Damages to the permitted project or uses thereof as a result of current or future activities undertaken by or on behalf of the United States in the public interest.
 - c. Damages to persons, property, or to other permitted or unpermitted activities or structures caused by the activity authorized by this permit.
 - d. Design or construction deficiencies associated with the permitted work.
 - e. Damage claims associated with any future modification, suspension, or revocation of this permit.
4. Reliance on Applicant's Data. The determination of this office that issuance of this permit is not contrary to the public interest was made in reliance on the information you provided.
5. Reevaluation of Permit Decision. This office may reevaluate its decision on this permit at any time the circumstances warrant. Circumstances that could require a reevaluation include, but are not limited to, the following:
- a. You fail to comply with the terms and conditions of this permit.
 - b. The information provided by you in support of your permit application proves to have been false, incomplete, or inaccurate (see 4 above).
 - c. Significant new information surfaces which this office did not consider in reaching the original public interest decision.

Such a reevaluation may result in a determination that it is appropriate to use the suspension, modification, and revocation procedures contained in 33 CFR 325.7 or enforcement procedures such as those contained in 33 CFR 326.4 and 326.5. The referenced enforcement procedures provide for the issuance of an administrative order requiring you comply with the terms and conditions of your permit and for the initiation of legal action where appropriate. You will be required to pay for any corrective measures ordered by this office, and if you fail to comply with such directive, this office may in certain situations (such as those specified in 33 CFR 209.170) accomplish the corrective measures by contract or otherwise and bill you for the cost.

6. Discretionary Authority. This office has the discretion to suspend, modify, or revoke authorizations under this permit. This discretionary authority may be used by us to further condition or restrict the applicability of this permit for cases in which we have concerns associated with the Clean Water Act Section 404(b)(1) Guidelines, or regarding any factor of

the public interest. Should we determine that a proposed activity may have more than minimal individual or cumulative adverse impacts to waters of the United States or otherwise be contrary to the public interest, we will modify the authorization to reduce or eliminate those adverse effects or notify you that the proposed activity is not authorized by this permit and provide instructions on how to apply for authorization under another type of DA permit. Activities not meeting the terms and conditions of this permit may be authorized through another type of permit from us, such as a Nationwide Permit, Regional General Permit, Letter of Permission, or Standard Permit. We will determine on a case-by-case basis whether an activity has a more than minimal impact, individually or cumulatively, on the aquatic environment or may be contrary to the public interest. We may include additional special conditions to a verification under this permit to ensure the activity has minimal impact. We may also restore authorization under this RGP at any time we determine the reason for asserting discretionary authority has been resolved or satisfied by a condition, project modification, or new information. We may also use our discretionary authority to modify, suspend, or revoke this RGP/PGP at any time.

PERMIT DURATION: This permit is valid for five years from issuance and will expire on **March 20, 2029**. We may re-evaluate the terms and conditions of this permit at any time we deem it necessary to protect the public interest. If we have not reissued this permit by the expiration date, this permit will no longer be valid. Activities authorized by this permit must be verified in writing by this office. Verifications are valid until the permit expires.
