Subject: Record of Decision for the Sites Reservoir Project Permit Strategy

On April 17, 2026, the U.S. Army Corps of Engineers, Sacramento District (Corps), completed a Record of Decision (ROD) for the Sites Reservoir Project. The ROD may be found at

<https://www.spk.usace.army.mil/Missions/Regulatory/Permitting/Environmental-Impact-Statements/>

The ROD follows the issuance of the U.S. Bureau of Reclamation's Final Environmental Impact Statement (Final EIS) in November 2023. The ROD documents the Corps' evaluation under the National Environmental Policy Act and informs the Corps' approach to any future permit evaluations for the project. The ROD does not authorize construction or constitute a Department of the Army permit decision.
